DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 05, 2007 has been entered.

Claim Objections

2. Claim 30 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The limitations of claim 30 appear to be redundant.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 32 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

“the knock lever mechanism” lacks positive antecedent basis.

Claim Rejections - 35 USC § 103

Art Unit: 3724

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 28-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arends et al. (US 4, 306,474) in view of Wittek (US 1,796,417).

Arends discloses the invention substantially as claimed except for a roller feed assembly including a drive release mechanism configured to cooperate with the die as the treadle is moved towards a stationary platen carrying the die so as to release the roller feed assemblies in response to cooperation of the drive release mechanism with the die. Wittek discloses a roller feed assembly (e.g., 21, 22) including a drive release mechanism (e.g., 43) configured to cooperate with a reciprocating assembly so as to release the roller feed assemblies in response to cooperation of the drive release mechanism with the reciprocating assembly. It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a roller feed assembly as taught by Wittek on the device of Arends as an alternative structure for providing the stepwise advancing of the workpiece. Regarding claims 31-32, a knock lever mechanism having a lever arm and a follower wheel (e.g., 21, 22, and end portion of 43 of Wittek).

Allowable Subject Matter

7. Claims 1-3, 11-14, and 33 are allowed.

Response to Arguments

Art Unit: 3724

8. Applicant's arguments filed July 05, 2007 have been fully considered but they are not persuasive. Applicant contends that claims 28 and 31-32 have been amended to overcome the previous rejection under 35 U.S.C. §103(a).

The amended claim 28 is substantially similar to the previously presented and rejected claim 10.
